HOOD PHILOSOPHY

WE HAD A VISION...
TO CREATE SIMPLE-TO-USE
ERGONOMIC CHAIRS
THAT WOULD FIT EVERYBODY,
EVERYWHERE. RESOURCES ARE
PRECIOUS, SO A SUSTAINABLE,
LONG-LIFE DESIGN WAS
ESSENTIAL WHILST OFFERING
AFFORDABILITY FOR ALL.
AT HOOD, WE DELIVER OUR
RANGE OF UNIQUE CHAIRS
QUICKLY TO OUR RESPECTED
DEALER NETWORK WITH
A PERSONAL SERVICE AND
COMMITMENT TO LONG-TERM
RELATIONSHIPS.

We all deserve to have our bodies supported correctly. Hood Seating encourages dynamic movement to improve our blood flow so we feel great and are focused to work. Hood delivers healthy, affordable seating for everyone.

Where once ergonomics was about preventing or mitigating harm, it is now about helping people be more healthy, productive and active.

High-end seating manufacturers recognise the importance of muscle movement and engineer chairs to encourage people to shift position whilst seated. This movement stimulates the muscles; increases blood flow, relieves pressure points, and helps with concentration.

The mechanisms that enable this movement are no longer the exclusive domain of expensive chairs and can now be found throughout the Hood range. Healthy seating is no longer the luxury for the few but an affordable solution for everyone.

Comfortable employees typically work better; are happier and reduce the sick days an organisation can suffer. Hygiene, too, is improved by using modern materials such as mesh which offers ventilation and is easy to clean.

Our unique patented chairs have been designed so that every component can be removed and replaced to deliver extreme product longevity. Replacing damaged parts is good for our environment too.

You can be confident your Hood chair will always deliver at peak performance and outstanding return on investment.

i29'S ERGONOMIC ENGINEERING DELIVERS SUPERB SUPPORT AND DYNAMIC MOVEMENT.

The i29's patented floating lumbar/pelvic support system and intuitive controls make it a favourite for people with back pain and trauma. Users from 5'2" to 6'6" get support and dynamic movement from the moment they sit in the i29.

The i29 boasts one of the most intuitive mechanisms on the market. With three easy-to-use pictorial controls on the right-hand side operating seat height, seat depth and advanced dynamic movement, the back can also be locked at any angle from 90° to 145°. This knee tilt mechanism has the first articulation at the underside of the thighs and the second point under your sitting bones (ischial tuberosities), delivering constant support in active mode and reducing pressure on the underside of the thighs.

The extendable direct tension control adjusts the resistance of the chair to balance users weighing from 8 to 23.5 stone.

Our patented floating lumbar support automatically moves with you when in dynamic mode, giving continuous lumbar support. The chair's split back is designed to deliver independent upper back support as well as ensuring the patented lumbar system protects the lower regions – keeping the user's pelvis rotated.

The back can easily be height adjusted for each user's anthropometric measurements by releasing two buttons on the back of the chair.

The i29 is fitted with an aluminium five-star base as standard. The chair can also be enhanced with optional features. Two different styles of optional headrests are available and may be retro-fitted – the Executive headrest is ideal for 24/7 use and managerial areas, and the Ergonomic headrest provides more adjustment.

The 4D multi-functional arms incorporate three buttons to adjust the length, width and height. The soft yet durable arm pads can also be angled to suit. If customers prefer their chair without arms, they can be removed easily leaving the design uncompromised and safe for users. Another useful option is a coat hanger which can be attached to the back of the chair keeping jackets and coats uncrumpled and safely off the floor.

F94 101 IS THE CHAIR FOR EVERY SCENARIO; FOR EVERY WORKSPACE ENVIRONMENT.

Simple and intuitive controls make it easy to adjust with minimal training, helping everyone to actively sit properly.

The F94's pictorial buttons make it easy to adjust height, seat-slide and tilt. Dynamic movement is essential to encouraging blood flow throughout the body – the direct tension control below the pictorial buttons adjusts to balance the chair for all users weighing 8 to 23.5 stone.

Designed to encourage healthy seated posture, F94's integrated lumbar curvature offers superb lower back support with an extra lumbar panel to adjust perfectly within the 6 ratchet positions. The top of the back offers full thoracic support (upper back and shoulders) which are often neglected.

The F94 is built to last with a polished aluminium base as standard and is upholstered as full mesh or with a fabric seat option.

The F94's arms can be removed easily leaving the design uncompromised and safe for users. Another useful option is a coat hanger which can be attached to the back.

The optional executive headrest offers a larger headrest for comfort and the ergonomic headrest provides additional adjustment and more concentrated support.

“ It supports my lower back really well and has stopped me from slouching too. ”

FEATURES

Simple and intuitive controls mean it is easy to adjust with minimal training, helping everyone to actively sit properly.

10 year warranty.

THE C19 IS THE ULTIMATE CONTRACT CHAIR.

**This exceptionally comfortable, great value contract chair features ergonomic design and adjustment without compromising on style.
5 year warranty.**

We asked our dealers 'what is missing in the Hood portfolio?' – the feedback was that our seating collection needed a quality, value-for money, stylish contract chair. We paid attention and developed a new product to meet this criteria.

The C19 task chair is the result of this development process.

Drawing from our experience and knowledge of the marketplace and from the leading features of our other products, we have created a chair that delivers on comfort, design, ease of use and ergonomics. We have achieved this while hitting a target price point that make it incredibly competitive in the marketplace.

The C19 task chair comes with a mesh tall back and upholstered seat pad as standard. With its clean aesthetics and easy-to-use design, the C19 offers intuitive ergonomic functionality alongside fantastic value and comfort for a wide range of user heights. The C19 boasts an intuitive mechanism with two easy-to-use pictorial controls on the right-hand side to operate seat height and dynamic movement. The C19's buttons make it easy to adjust seat height and tilt. Dynamic movement is essential to encourage blood flow throughout the body – the direct tension control below the seat adjusts to balance the chair for users between 8 and 23.5 stone.

Designed to encourage healthy posture, the C19's lumbar panel adjusts easily to offer great lumbar support. The C19's 3-dimensional arms with soft-touch pads can be removed easily leaving the design uncompromised and safe for users.

The C19 is built to last with interchangeable parts. We can also offer a mesh seat option and 56 different textile option, subject to lead times, enabling each customer to specify the chair to suit their requirements and style.

“ Staggeringly comfortable for such a simple chair. ”
