BRITISH DESIGN & MANUFACTURING

Social Spaces products are designed and manufactured in the UK. Every piece of furniture in our Social Spaces range is made to order, with skilled precision and rigorous attention to detail. Our key industry knowledge and experience drives the highest levels of product quality, using the latest technology and high-grade materials that minimise any environmental impact and comply with UK and European quality standards.

Modern office environments call for stylish design in every aspect of their specification and our Social Spaces product portfolio is more diversified than ever, with unique product offerings that offer all the good looks and aesthetic choices to satisfy the latest trends and the most enduring designs. Transform the office environment into a modern, multi-functional workspace where people can meet, relax or dine in comfort.

Our in-house product design team have a passion for office furniture, creating original, individual pieces and ranges to enhance any workplace. We design and make intelligent products that are manufactured to meet real needs of the office furniture industry. We're committed to bringing our clients unique product offerings that are sought after for their compelling design, superior quality, and exceptional value.

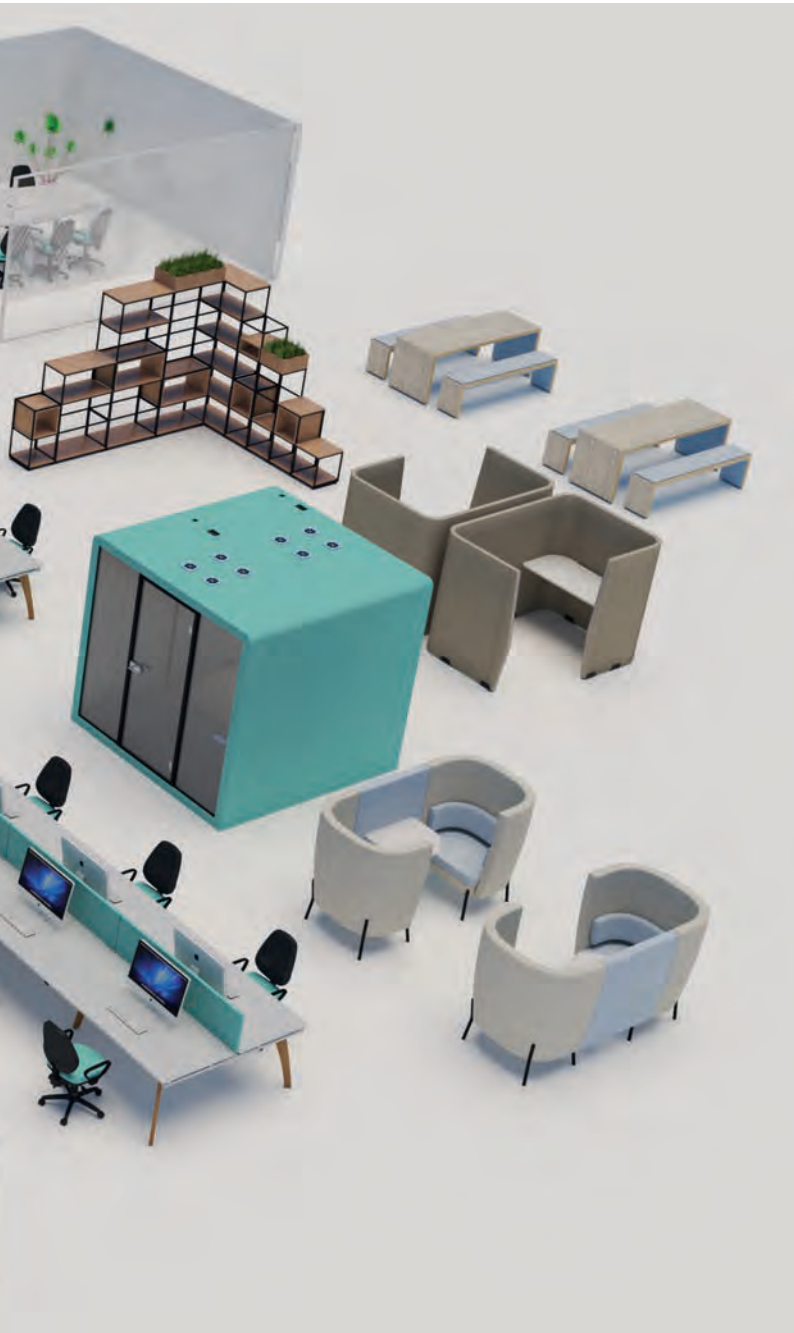

WORK SPACES

The wellbeing of employees in the workplace is becoming more vital, and office furniture can play a huge part in helping to keep people happy and healthy when they're working. The most productive employees are those who feel at home when they're in the workplace. Companies that don't provide workers with the types of spaces they need to manage the demands of work will find this can have a negative impact on employee wellbeing.

The workplace has always been more than just a place to work. The most effective and modern office spaces are characterised by division into different zones that support employees as they perform particular tasks. An office should be adjusted to employees, not the other way round. A good solution to each of these problems is the right office space arrangement combined with the right choice of functional furniture solutions.

Multi-functional work spaces are all about large areas and open spaces that provide plenty of room for movement and versatile seating arrangements. In the long-term, multi-functional spaces will be the reason why people enjoy coming into the office. These are the spaces where people can work according to their own needs and preferences and interact with the people around them to feel part of a community.

SERVICE & SUPPORT

The look of your workplace can play a very important role in the success of the company. Having an aesthetically pleasing office can help with both attracting customers and retaining top talent. You need to consider furniture that can match the aesthetic you are trying to achieve. Consideration for the finishes and fabrics used in your furniture will make it easier to match the look and feel of your office.

Our in-house team of space planners and design experts can analyse your room, suggest the perfect furniture solutions for your space, and make recommendations on which fabrics will work the best for your business, with mood boards and photo-realistic static visuals. Additionally, we will also evaluate your current and future office needs. Our goal is to create an interior that improves the office workflow, improves efficiency and amenities for your workplace, and looks good, too.

We can retro-fit your existing products, re-design your spaces, and help you re-imagine your new normal. Whatever that looks like, we will work with you to make sure your employees feel welcome, inspired, and are comfortable in their place of work. Contact our team today to find out more!

For made to order laminate table tops add £150 to RRP

A high-angle photograph of a man and a woman sitting in modern, curved armchairs in a lounge setting. The man, on the right, is wearing a light blue shirt, a dark tie, and dark trousers. The woman, on the left, is wearing a light blue shirt and dark shorts. They are both looking towards each other. The chairs are upholstered in a light green fabric with a blue interior. The floor is made of wide wooden planks. A white coffee table is visible in the lower right, with a magazine and some snacks on it. A grey rug is partially visible under the chairs.

TILLY

Tilly is a family of components that can easily be crafted together to create formal or informal settings that support today's working environments. The comfortable seat and separate backrest are incorporated in high sides that can play the role of screens.

SILEN

Silen can be customised to fit your own office requirements, creating multiple working zones in one place. Silen hubs are perfect dividers for work and relaxation areas, and you can just activate the wheels and roll your private retreat easily wherever you're in the mood.

PRIVA

The loss of private space in an open plan work area has inspired the design of the Priva workstations, which can be configured to specific needs and support individual work zones. The repertoire of geometric shapes can be positioned to suit defined spaces.

OPTIONAL EXTRAS

COCCYX CUT OUT **£65**

Coccyx cut out reduces the pressure applied to the coccyx at the base of the spine while seated. The foam in the area has been replaced with a lower density to relieve pain.

INFLATABLE THORAX **£35**

Inflatable thorax supports the spine in the upper back region by ensuring the gap between the thoracic part of the spine and the back is filled.

INFLATABLE LUMBAR **£35**

Inflatable lumbar provides support to the lower back and promotes good ergonomic posture. Inflating the internal lumbar reduces strain on the spine.

AIR RELEASE SEAT **£100**

For a softer seat, release the air from the self-inflating seat pad.

BASE **£45**

Polished 5 star base.

A photograph of a workspace featuring a silver laptop with a black keyboard in the upper left. Below and to the right of the laptop are several sheets of architectural blueprints with brown line drawings of floor plans, including rooms, doors, and furniture. In the bottom right corner, there are several pieces of wood with different grain patterns, likely for furniture. A dark blue rounded rectangle with a white border is positioned in the lower center, containing the text for this section.

PROJECT SUPPORT

Selecting the right fabric upholstery for seating, and the right wood finishes for your tables and desks, can seem like a daunting task. It's easy to become overwhelmed when selecting fabrics and laminates as there seem to be an infinite amount of options when it comes to colours, textures and patterns. The workplace's atmosphere and overall appearance will be greatly influenced by the colours and patterns you select for your office furniture.

INSPIRATION & COLOURS

The workspace – and in particular the products in that space – needs a customised touch. It helps employees create a stronger, more meaningful connection to the workplace. It also fosters an atmosphere that attracts people to the office.

A personalised touch and strategic branding is an effective way to help employees connect with the modern workplace environment.

Colour has a major impact on our emotions and how we act, so it can certainly be used to deliver an inviting office. One of the surest design tips for an interior is to include the natural world. The science shows that nature improves both happiness and creativity.

When people are working longer hours and getting pulled in so many different directions, having softer, more textural materials close to your body is really important to your sense of wellbeing.

COMBINATIONS & MOODS

Inspiration should do more than make you feel good. It's the foundation of collaborative design.

Mood boards can serve many purposes, starting with organising the inspiration around a project. They can be a valuable resource throughout the design project, to help keep the style and aesthetic consistent and on track with a client's goals and expectations.

Mood boards are also an excellent way to refine a project's style before diving into the actual design process.

Natural light, natural colours and natural products all work together to create the optimum environment for productivity and creativity. Contact with nature and our response to it continues to exercise significant effects on people's physical and mental health, performance, and well-being. Natural products are also more tactile, more versatile, and when it comes to good acoustics, measurably more effective.

Wood ranges

We have a selection of MFC wood finishes for our workstations and table ranges, with some products also available with MDF laminate made-to-order tops.

MFC Wood Finishes

We only use FSC-certified wood when manufacturing our products in-house in the UK, with total traceability for every order. Constructed from a chipboard core and finished with a decorative melamine covering, MFC is a versatile product ideal for use with office furniture.

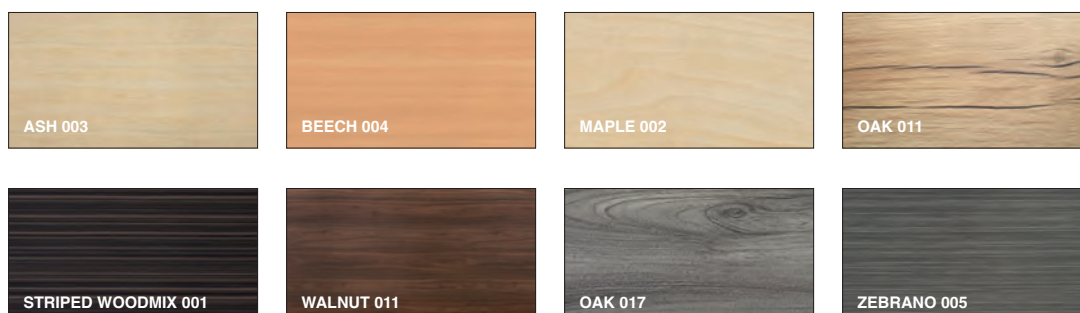

MDF Wood Finishes – Altofina Collection

Dazzling and innovative decors, finishes and performance grades have been introduced to mingle with a selection of mainstream decorative laminates. The Altofina laminate collection creates interior spaces that are both brilliantly designed and commercially affordable.

IMPORTANT INFORMATION

Fabric restrictions

Certain soft seating fabrics listed in this guide may not be suitable for use on all soft seating products. We reserve the right to reject orders to make products in selected fabrics if we believe that the fabric is inappropriate for use due to 'fit and form' unsuitability. In this instance we will always recommend a similar fabric that is more suitable for use on that particular product.

Fabric bands

Please contact our sales team for a price if your preferred fabric choice is not listed. Please make sure you check the suitability of a fabric before recommending a product. If two fabrics are used on one item e.g. two-tone, the cost is calculated on higher of the two fabric bands. All orders for leather are priced on application.

Fabric colour variations

Whilst every effort is made, no guarantees are made against the minor variations in the colour of commercial fabrics. All striped fabric will be upholstered vertically unless advised otherwise.

Photographed upholstery

While every effort is made to represent colours accurately, we cannot guarantee the colours you see exactly match the colours of the actual fabric due to printing processes.

Measurements

All measurements are in millimeters and can have a tolerance of $\pm 12\text{mm}$ on all soft seating. Measurements may vary depending on components used and we reserve the right to change them from time to time.

Customers own fabrics

Fabrics not listed or customer supplied fabrics need to be approved before acceptance of orders. A pattern charge may apply to some fabrics. We reserve the right to reject fabric that we believe to be unsuitable for the product. We are unable to guarantee any product or fabric supplied by a customer meets fire regulations or standards.

Ordering

For all made-to-order products, it is our policy that once these products have been ordered they cannot be canceled or amended.

Pricing

All prices shown are in sterling (£) and are subject to current rate of VAT.

Warranty

All products are guaranteed against manufacturing defects, except for upholstery, castors and mechanisms which are subject to usage related wear and tear. The warranty is effective from the day the product leaves the factory and the supplier reserves the right not to apply the warranty in cases of inappropriate use or when a product has been tampered with by a third party or interventions by non-authorised personnel. All complaints concerning the goods must be made in writing and the company shall undertake to repair any product or part of a product that proves to be faulty.
