Aria

The height of versatility

**SOCIAL
SPACES**

With versatility at its core,
Aria rises to any occasion.

Increasingly, we are seeing dramatic shifts in the ways that we work, study, and collaborate. Spaces are no longer single-purpose; multi-functionality, versatility, and agility are now primary principles in commercial and dynamic interiors.

Aria gracefully delivers on these modern expectations. Whether working, learning, or enjoying some free time, this collection of tables and benches serves as a foundation to nurture creativity and focus.

simple and clean

design philosophy

The lines of Aria's simple frame are elegant yet sturdy, with slanted legs that not only provide stability, but direct the eye upwards towards the table's surface.

The series' distinctive silhouette is completed by the intersecting bars that connect gracefully between each leg, not only creating a harmonious look and providing visual interest, but further enhancing the durability of the range.

Matteo Coracin - Designer Profile

mC.dsg is an Italian design studio founded by Matteo Coracin in 2017. The studio takes inspiration mainly from the simple lines, the nature and the emotions that only the cured objects give. Concepts that arise from the "emptiness idea": products designed first of all to create emotions in their essentiality. "All you need is less" is the philosophy of our design. Objects

designed with passion that take their cue from tradition, but are faced with a modern approach, even thinking about the smallest details.

Stand up, stand out

The radiused edges of the top invite engagement from any angle, expanding on the ample space along the table's length.

The light, elegant lines of the Poseur table's legs present a minimalistic appearance, with a slender frame that masks its sturdy resilience.

poseur table

Meet as equals.

The refined yet simple design of Aria's Dining or meeting tables conveys a sense of approachability, while its rounded top invites open collaboration. Like the round table, the Aria dining table holds all participants on equal footing.

Be it a meeting or a collaboration space, Aria's minimalist design complements many aesthetics and functions, bringing elegance.

tables

coffee table

Take it easy

The Aria Coffee rounds off any restful space perfectly. Its simple three leg design is crafted from powder coated steel frame, ensuring both durability and refinement. The unique design of the legs, with crossbars seamlessly integrated into the legs, adds visual interest while presenting the perfect spot to set down your coffee and take a moment.

stool & bench

Complete the set

The leg design of the Aria tables is echoed in the seat benches and stools, offering the same steadfast durability and striking silhouette. Extra comfort can be provided via upholstered pads, following the seat profile.

eye for detail

Minimal with interest

With sleek curves and smooth lines, Aria's construction is truly minimalistic. Devoid of visible fixings, the structure of every piece in the range remains robust, with a near-seamless form.
