# Figaro

---

**SOCIAL  
SPACES**

Comfort by nature

---

---

## Bring life to your space.

In blending the natural world with the built environment, biophilic design breathes life into any space and enhances wellbeing. The Figaro range, with forms that echo the contours and conical shapes found in nature, brings an environment to life while offering effortless, ergonomic comfort. Designed exclusively by Martin Vicker.

---

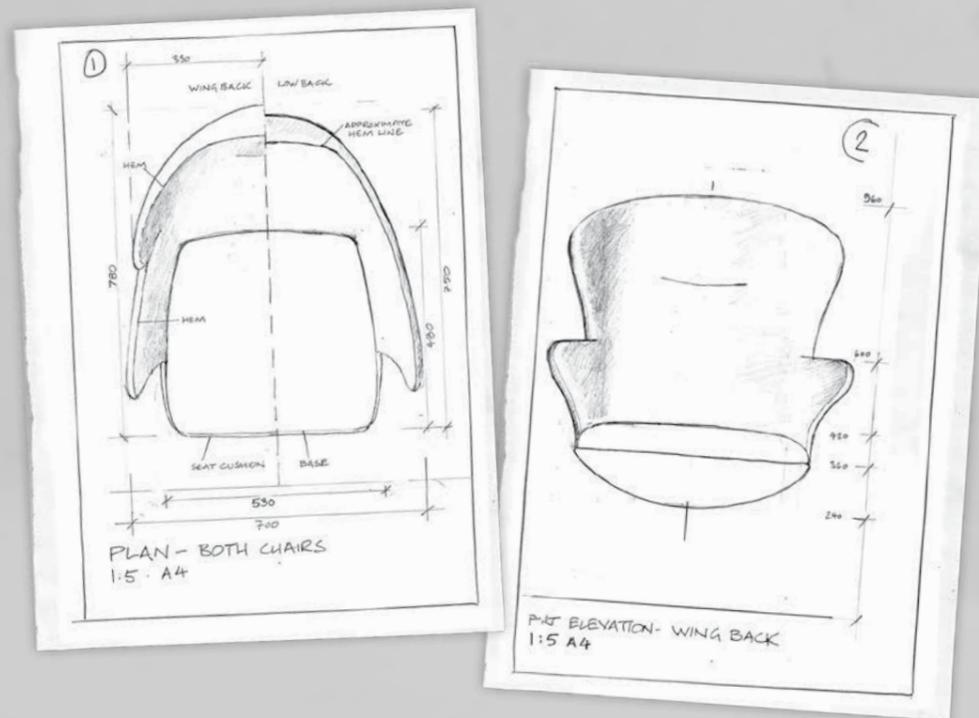

# For your natural habitat

# design philosophy

Figaro epitomises one of the most difficult and noble disciplines of design is to create simple, well-functioning, and almost ordinary objects that nevertheless have a strong identity.

Figaro was designed just to do that. The chair's sculptural language, paired with its well-proportioned soft seat, refuses to compromise on comfort and invites the user to sit for long periods of time. A sculptured form that is as pleasing to the body as it is to the eye.

## Martin Vicker – Designer Profile

As a designer with over 30 years of industry experience, Martin Vicker is known for his work on many highly acclaimed interiors in the UK. Many of these award-winning projects showcase his own furniture and product ranges, and are widely published.

Presently, he is focussed on the origination of seating and product design concepts using sustainable materials, specialising in the use of cork, a material native to where he now lives in rural Spain.

Additionally, his knowledge of interior design and passion for social spaces and natural environments has brought him into the realm of landscape and garden design, a service he provides on the ground in Spain and Portugal.

Martin has been working in collaboration with Social Spaces since 2017.

# wooden base

---

---

## Crafted simplicity

Created in smooth timber, Figaro's pyramidal shaped wooden base option presents a final biophilic touch for a harmonious space. When paired with neutral, earthy tones, this natural base enhances a serene and coherent environment.

---

---

## Contrasting designs

The classic 4-star base adds a contemporary twist to any setting. It creates a blend of modern aesthetics and nature-inspired forms, offering a polished look that complements the organic design of Figaro. In contrast the conical spiral base creates a striking focal point with its unique, avant-garde design. Vertical bars create a sense of movement and weightlessness, echoing the twisting forms found throughout the natural world. As sunlight passes through a space, the shadows cast by this base dance across the floor, adding dynamic visual interest.
